

SCRATCHED ALLOY WHEELS

My alloy wheels are starting to look really tatty, is there anything that can be done to make them look like new?

Our first port of call would be to recommend sending your wheels to a company, who refurbish alloy wheels front to back to an amazing standard. They have various different finishes you can choose from and also they can colour match or you can choose a colour you prefer. For the longest lasting finish they would recommend you have a powder coated finish as this is a lot more durable and will not lift like lacquered wheels do. They can colour code to OE specification on various manufacturers for example Mercedes and BMW.

We offer three services. *The first option:* where you bring your car to us, we will then strip the tyres off and send your wheels away, they will then be returned in 5 working days, *second option:* an express service with a turn around of 3 days, or *third option:* an exchange service where they provide a set of wheels (the same as yours) already refurbished on the day we send yours away.

Wheels with buckles, cracks, flat spots and pieces missing can be repaired, however they cannot perform miracles, some wheels unfortunately are beyond help.

Our second port of call would be to recommend new wheels. We deal mainly with TSW, who we have found to supply us with a very high quality wheel and excellent service. New wheels can on occasions be cheaper than refurbishment especially the smaller wheels. TSW also offer excellent tyre and wheel packages for those looking for a larger wheel.

Thirdly, if your strapped for cash we do use a company who can just touch up minor damages, which can be done on site.

For any further information and prices please call us on 542292.

Yet again please be aware that this is only our opinion. Please write in with your questions to T.W. Tyres, 11 Paynes Lane, Rugby, CV21 2UH, or email us on info@twtyres.com. We are open Monday to Friday 8am till 5.30pm and Saturday is 8am till 3pm. For tyres, exhausts, batteries and motorbike enquiries please call us on 542292. For servicing, repairs and car MOTs you can contact us on 544339.
